

CLINISAN for Healthcare

CLINISAN is a simple, accurate and safe solution that can be used to disinfect hard surfaces at **0.5%, 0.1%**, as a **no-rinse food surface** disinfectant and as a **general disinfectant** for all hard surfaces as shown below.

Benefits

- **Less risk** to your staff when diluting disinfectant
- **Less storage room** required
- **pH of 5.5-7** - Close to skin pH and kinder on staff and patients
- **Less plastic waste** creation and therefore less waste processing costs
- **Lower risk Dangerous Goods Class** than typical Chlorine compounds
- **Less corrosive** than acidic, alkali and other chlorine products
- **Accurate dilution** - over or under dilution risk reduced

Dilution	Surfaces	Tablets Dilution (1g tablet per)	Tablets Dilution (5g tablet per)
Hospital Grade Disinfection	Hard Surfaces - Hand rails, walls, floors, bed frames, benches, tables, beds	300 ml	1.5 L
Critical Toilet and Bathroom	Toilets, Basins, Showers	300 ml	1.5 L
Food Contact Surfaces (No Rinse)	Eating tables, kitchen surfaces, benches	2 L	10 L
Toy Disinfection Soak	Hard plastic and wooden toys	2 L	10 L
Mops and Dishcloth Soak	Soak mops and cloths to disinfect	5 L	25 L

Bactericidal
99.999%
5 min contact

Norovirus
99.99%
5 min contact

Results at 1000 ppm

Tested to TGA's Hospital Grade Standard

Fungicidal
99.99%
5 min contact

Coronavirus
99.999%
5 min contact

Health and Safety

CLINISAN's active ingredient was tested in a confined space compared to bleach. The airborne chlorine was measured in this assessment to see the exposure to users of each disinfectant

	Concentration (ppm)	ACGIH Standard	Peak Detected Airborne Chlorine (ppm)	% of samples over Lower Detection Limit
Bleach	0.2%	0.4 ppm	0.5	31%
	0.5%		0.7	65%
NaDCC (Clinisan)	0.2%		0.1	2%
	0.5%		0.1	3%

Lower Detection Limit of 0.1 ppm

NaDCC is was found to have between 2% and 5% measurements over the Lower Detection Limit compared to Bleach's 31% and 65%, also a much lower peak of 0.1 ppm compared to 0.7 ppm. Showing a much reduced exposure to airborne chlorine for your staff and children

ACGIH - American Conference of Governmental Industrial Hygienists - **The strictest standard to be found**

Biodegradability and Sustainability

NaDCC has been found to be biodegradable under real world conditions producing beneficial environmental products. Clinisan is stored in a fully recyclable tub with no individual packaging.
